

## Strip Doors & Hardware

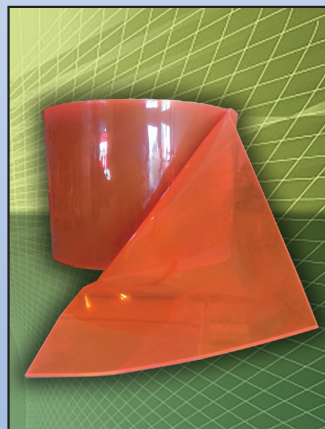

National Access Design, LLC manufactures an extensive line of PVC strip doors, barriers, and custom hardware for these products. We offer three grades of material - standard, low temperature and extra low temperature.

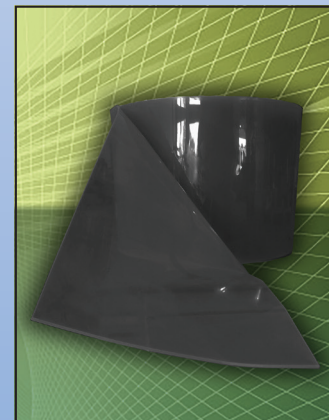

In the standard and low temperature grades we offer a ribbed material which was developed to reduce damage to the strip and to help maintain the clarity of the product.

Our low temp and extra low temp materials are ideal for freezer applications. These materials meet USDA and FDA regulations for meat packing, poultry and dairy industries. Extra low temperature material is rated at -70F.

Our extensive line of PVC strips come in a variety of widths and thicknesses as well as safety orange to outline the opening.

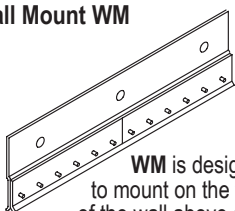

We offer weld screen material which is designed to protect personnel by screening out dangerous UV rays and light.

### Fast Mount FM

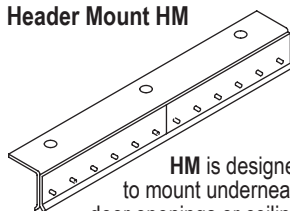

FM is 10 times faster than the traditional mounting system. Available in polymer version.

### Wall Mount WM

WM is designed to mount on the face of the wall above door openings. Available in galvanized, stainless, aluminum.

### Header Mount HM

HM is designed to mount underneath door openings or ceiling. Available in galvanized, stainless, aluminum.
